

EXPERT EVALUATION SHEET: THE A-CARE FRAMEWORK USER GUIDE

Evaluator Details:

Name: Faizan Junani

Organization: Snappymob

Country: Malaysia

Role: Senior QA Engineer

Years of Experience: 8

Instructions:

Kindly examine the attached User Guide for the Framework Implementation and note your feedback on the evaluation sheet. Your feedback will be utilized for the revision of the guide and the results of PhD research.

SECTION 1. CLARITY AND COMPREHENSIBILITY

Objective: Examine whether participants can independently grasp and navigate the framework.

Criteria	1	2	3	4	5	Comments
Transparency regarding the three-phase structure (Pre, During, Post Elicitation)	☐	☐	☐	☐	☒	
Understanding the "Who Should Use This Guide"	☐	☐	☐	☐	☒	
The diagrams (Figures 1, 2, 3...) are visually easy to understand	☐	☐	☐	☒	☐	
The user guide has a logical structure and is easy to navigate	☐	☐	☐	☐	☒	
Content flows well, and the phases are easy to follow	☐	☐	☐	☒	☐	
The language used is relevant to Agile contexts	☐	☐	☐	☐	☒	
A new team member can utilize this guide independently of the author.					☒	

SECTION 2: ALIGNMENT WITH AGILE PRINCIPLES AND PRACTICES

Objective: Ensure the guide is aligned with Agile principles (iterative, communicative).

Criteria	1	2	3	4	5	Comments
Does it reflect Agile values (iterative, collaborative, adaptive)?	☐	☐	☐	☐	☒	
The framework facilitates iterative feedback loops and continuous validation.	☐	☐	☐	☐	☒	
The A-CARE approach is flexible enough to adapt to changing project needs.	☐	☐	☐	☒	☐	
Are Agile practices like sprints, stakeholder collaboration, and continuous feedback incorporated throughout the phases?	☐	☐	☐	☒	☐	
Does the guide reflect Agile values such as customer collaboration, working solutions, and responding to change?	☐	☐	☐	☒	☐	

SECTION 3. PRACTICALITY AND REAL-WORLD APPLICATION

Objective: To evaluate whether the guide is operationalized for practical organizational application.

Criteria	1	2	3	4	5	Comments
The design can be utilized in real-world Agile projects.	☐	☐	☐	☒	☐	
The manual outlines all phases with appropriate examples and use-cases.	☐	☐	☐	☒	☐	
Integrating AI tools into the requirements elicitation process is practical and beneficial.	☐	☐	☒	☐	☐	
Are there clear instructions, tools, and techniques provided for real-world implementation?	☐	☐	☐	☒	☐	
Does the framework go beyond theoretical concepts and provide practical solutions that teams can use immediately?	☐	☐	☐	☒	☐	
Are the steps actionable in real organizational settings?	☐	☐	☒	☐	☐	

SECTION 4: USABILITY AND INTEGRATION

Objective: To assess the practical implementation readiness and real-world applicability of the framework's supporting tools, guides, and use cases.

Criteria	1	2	3	4	5	Comments
Feasibility of implementing this guide in your current organization.	☐	☐	☒	☐	☐	
Effectiveness of the "Troubleshooting Guide" and "Quick Reference Checklists." ¹⁴	☐	☐	☐	☒	☐	
Relevance of the "Common Use Cases" to industry scenarios. ¹⁵	☐	☐	☐	☒	☐	
Ease of customization for different Agile maturity levels.	☐	☐	☐	☒	☐	
Clarity and usability of the provided templates and matrices.	☐	☐	☐	☒	☐	
Integration readiness with common Agile tools (e.g., Jira, Azure DevOps, Confluence).	☐	☐	☐	☒	☐	
Support for hybrid/remote team communication and collaboration.	☐	☐	☐	☒	☐	
Scalability of the framework for large, distributed, or regulated projects.	☐	☐	☐	☒	☐	
Alignment with organizational change management and adoption processes.	☐	☐	☐	☒	☐	

SECTION 5: PHASE-SPECIFIC EVALUATION

Objective: To gain expert opinions and qualitative assessments on the completeness, clarity, and practicability of the framework phase.

Phase	Key Components	1	2	3	4	5	Comments
Pre-Elicitation	Stakeholder identification & mapping	☐	☐	☐	☐	☒	
	Communication style analysis	☐	☐	☐	☐	☒	
	Influence-Interest Matrix	☐	☐	☐	☐	☒	
	Communication plan & feedback loops	☐	☐	☐	☐	☒	
	Team/stakeholder training	☐	☐	☐	☒	☐	
Elicitation	Structured techniques (interviews, workshops, AI chatbots)	☐	☐	☐	☐	☒	

	Visual modeling & prototyping	☐	☐	☐	☐	☒	
	User stories as “single source of truth”	☐	☐	☐	☐	☒	
	Traceability & risk documentation	☐	☐	☐	☐	☒	
	Continuous validation & prioritization	☐	☐	☐	☐	☒	
Post-Elicitation	Comprehensive documentation systems	☐	☐	☐	☐	☒	
	Traceability & change management	☐	☐	☐	☐	☒	
	Continuous improvement & adaptation	☐	☐	☐	☐	☒	
	Progress communication & stakeholder updates	☐	☐	☐	☐	☒	

SECTION 6: OVERALL USEFULNESS AND CONTRIBUTION

Objective: To assess the overall effectiveness of the framework in relation to enhancing the facets of communication, requirements elicitation, and stakeholder engagement in Agile projects.

Questions	1	2	3	4	5	Comments
Does the framework address real pain points in Agile requirements elicitation, such as communication breakdowns or stakeholder misalignment?	☐	☐	☐	☐	☒	
How effective is the framework in reducing requirements ambiguity and improving stakeholder engagement?	☐	☐	☐	☐	☒	
Does the guide contribute to enhancing the efficiency and clarity of requirements gathering, prioritization, and validation in Agile projects?	☐	☐	☐	☐	☒	
What is the long-term impact of using the framework in an organization? Does it support continuous improvement?	☐	☐	☐	☐	☒	

SECTION 7: QUALITATIVE FEEDBACK (OPEN-ENDED)

Objective: Collect expert opinions on the user guide A-CARE Framework on its strengths, clarity, applicability, and areas for improvement.

Questions	Response
1. What are the primary strengths of this user guide?	The 3 phase structure is pretty clear to understand, there's strong focus on communication and stakeholders, practical examples of templates, matrices and checklists are mentioned, aligns well with agile practices
2. Which sections, if any, were confusing or lacked sufficient detail?	There is limited practical guidance on usage of AI and end to end project examples are missing, even 1 example can be good
3. Are there any emerging Agile communication trends or tools (including AI) that should be added?	Some collaboration tools and AI meeting summaries
4. General recommendations for improvements or changes:	Can mark for mandatory and optional practices
5. Are there any additional tools or techniques that should be incorporated?	
6. Do you think any part of the framework needs to be simplified or removed for better understanding?	Can simplify risk management for small projects
